

FLORIDA  
POLYTECHNIC  
UNIVERSITY

# STEM SCHOLARS FORUM

SPEND THE DAY AT FLORIDA'S ONLY  
POLYTECHNIC UNIVERSITY

SATURDAY, FEBRUARY 23<sup>RD</sup>, 2019 - 9:00 AM TO 3:00 PM

Start your morning with a QR code scavenger hunt to learn about the University and what we do on a daily basis. As the day progresses you will have the chance to participate in four other activities:

- ◆ **Electrical Engineering:** Engineers spend a lot of their time trying to figure out the electrical mysteries of the world. We're going back to the basics by building our own circuit and will test some of the myths we see on the Internet.
- ◆ **Zombie Apocalypse:** Earth Impact, Science Friction, Cracking Genetic Code, The Big Bang Theory, STEM in Hollywood! These are definitely not your teachers' calculators! Texas Instruments will be at Florida Polytechnic to bring all of these things to life. Work with the Texas Instruments staff to learn about all the real-world STEM that goes on.
- ◆ **Coding, Programming, Gaming, & Designing:** These are common skills that Florida Polytechnic students have. Learn about what it really means to pursue a career in these fields and participate in a hands-on activity.
- ◆ **Campus Tour:** Meet with admissions staff to find out about what it takes to become a Florida Polytechnic Phoenix. Admissions staff will be available to answer all of your admissions questions while you take a tour of the Florida Poly campus to get a better feel for campus life and experience the atmosphere at Florida Poly.

Heartland STEM Scholars will get to tour the campus, talk to our admissions staff and student ambassador, enjoy lunch in our commons area, and experience Florida's only Polytechnic University.

**SEE YOUR STEM MENTOR TEACHER TO SIGN UP!**
