

Intel® Teach Elements Online Professional Learning Courses with Florida State Standards Alignments

The North East Florida Educational Consortium in cooperation with the Florida Department of Education, Heartland Educational Consortium, and Panhandle Area Educational Consortium are proud to announce the **21st Century Educator** and **21st Century Educator Leader** Certificates in partnership with the Intel® Teach Affiliate program. The 120-hour program for educators and 140-hour program for administrators will provide enough inservice hours for recertification. The certificate programs will address how to use technology to teach, assess, and monitor all students and how to meet Florida State Standards. The **21st Century Educator Leader** Certificate includes an add-on component to help teachers and administrators lead technology initiatives within their schools.

Each course is facilitated by a NEFEC and Intel® certified teacher to ensure the best outcomes for the program. Participants will complete three (3) core courses and a selection of one (1) additional course of their choice; for the leadership certificate, they will also complete *Educational Leadership in the 21st Century* course.

Buy 3 Intel® courses and get the 4th Intel® course free!
